

# CVE-2009-3852

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                      |
|------------------------|----------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2009-3852                                                                                                        |
| <b>State</b>           | PUBLIC                                                                                                               |
| <b>Assigner</b>        | cve@mitre.org                                                                                                        |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                         |
| <b>Published</b>       | 2009-11-03 16:30:00 UTC                                                                                              |
| <b>Updated</b>         | 2017-08-17 01:31:00 UTC                                                                                              |
| <b>Description</b>     | Unspecified vulnerability in the XML component in IBM Runtimes for Java Technology 5.0.0 before SR10 has unknown imp |

## Risk And Classification

**Problem Types:** NVD-CWE-noinfo

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor | Product                      | Version | Update | Edition | Language |
|-------------|--------|------------------------------|---------|--------|---------|----------|
| Application | ibm    | Runtimes For Java Technology | All     | All    | All     | All      |
