

# CVE-2009-4196

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                          |
|------------------------|--------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2009-4196                                                                                                            |
| <b>State</b>           | PUBLIC                                                                                                                   |
| <b>Assigner</b>        | cve@mitre.org                                                                                                            |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                             |
| <b>Published</b>       | 2009-12-04 11:30:00 UTC                                                                                                  |
| <b>Updated</b>         | 2017-08-17 01:31:00 UTC                                                                                                  |
| <b>Description</b>     | Multiple cross-site scripting (XSS) vulnerabilities in multiple scripts in Forms/ in Huawei MT882 V100R002B020 ARG-T run |

## Risk And Classification

**Problem Types:** CWE-79

## NVD Known Affected Configurations (CPE 2.3)

| Type     | Vendor                 | Product                                  | Version           | Update | Edition | Language |
|----------|------------------------|------------------------------------------|-------------------|--------|---------|----------|
| Hardware | <a href="#">Huawei</a> | <a href="#">Mt882 V100t002b020 Arg-t</a> | firmware_3.7.9.98 | All    | All     | All      |
| Hardware | <a href="#">Huawei</a> | <a href="#">Mt882 V100t002b020 Arg-t</a> | firmware_3.7.9.98 | All    | All     | All      |
