

# CVE-2010-0211

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                       |
|------------------------|-----------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2010-0211                                                                                                         |
| <b>State</b>           | PUBLIC                                                                                                                |
| <b>Assigner</b>        | cert@cert.org                                                                                                         |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                          |
| <b>Published</b>       | 2010-07-28 12:48:00 UTC                                                                                               |
| <b>Updated</b>         | 2024-01-21 01:35:00 UTC                                                                                               |
| <b>Description</b>     | The slap_modrdn2mods function in modrdn.c in OpenLDAP 2.4.22 does not check the return value of a call to the smr_nor |

## Risk And Classification

### Problem Types: CWE-252

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor                   | Product                         | Version | Update | Edition | Language |
|------------------|--------------------------|---------------------------------|---------|--------|---------|----------|
