CVE-2010-3387

[Source: Mitre](#)[Source: NIST](#)[CVE.ORG](#)[Print: PDF](#) 

Certain versions of [Vdr](#) from [Tvdr](#) contain the following vulnerability:

**** DISPUTED **** vdrleaktest in Video Disk Recorder (VDR) 1.6.0 places a zero-length directory name in the LD_LIBRARY_PATH, which allows local users to gain privileges via a Trojan horse shared library in the current working directory. NOTE: a third party disputes this issue because the script erroneously uses a semicolon in a context where a colon was intended.

CVE-2010-3387 has been assigned by [M](#) cve@mitre.org to track the vulnerability
