

# CVE-2011-1588

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                          |
|------------------------|--------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2011-1588                                                                                                            |
| <b>State</b>           | PUBLIC                                                                                                                   |
| <b>Assigner</b>        | secalert@redhat.com                                                                                                      |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                             |
| <b>Published</b>       | 2019-11-14 02:15:00 UTC                                                                                                  |
| <b>Updated</b>         | 2020-08-18 15:05:00 UTC                                                                                                  |
| <b>Description</b>     | Thunar before 1.3.1 could crash when copy and pasting a file name with % format characters due to a format string error. |

## Risk And Classification

### Problem Types: CWE-134

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor                   | Product                      | Version | Update | Edition | Language |
|------------------|--------------------------|------------------------------|---------|--------|---------|----------|
