Summary

CVE	CVE-2011-2327
State	PUBLISHED
Assigner	oracle
Source Priority	CVE Program / NVD first with legacy fallback
Published	2011-10-18 22:55:02 UTC
Updated	2026-04-29 01:13:23 UTC
Description	Unspecified vulnerability in the Oracle Communications Unified component in Oracle Sun Products Suite 7.0 allows local users to execute arbitrary code with root privileges via a crafted SOAP request. The vulnerability is due to a buffer overflow in the SOAP parser. A remote attacker can exploit this vulnerability to execute arbitrary code with root privileges. The vulnerability is caused by a buffer overflow in the SOAP parser. A remote attacker can exploit this vulnerability to execute arbitrary code with root privileges. The vulnerability is caused by a buffer overflow in the SOAP parser. A remote attacker can exploit this vulnerability to execute arbitrary code with root privileges.
