

# CVE-2011-2650

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                               |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2011-2650                                                                                                                 |
| <b>State</b>           | PUBLIC                                                                                                                        |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                 |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                  |
| <b>Published</b>       | 2011-08-23 21:55:00 UTC                                                                                                       |
| <b>Updated</b>         | 2017-08-29 01:29:00 UTC                                                                                                       |
| <b>Description</b>     | Cross-site scripting (XSS) vulnerability in Kiwi before 3.74.2, as used in SUSE Studio 1.1 before 1.1.4, allows remote attack |

## Risk And Classification

### Problem Types: CWE-79

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                         | Product                            | Version | Update | Edition | Language |
|-------------|--------------------------------|------------------------------------|---------|--------|---------|----------|
| Application | <a href="#">Marcus Schafer</a> | <a href="#">Kiwi</a>               | All     | All    | All     | All      |
| Application | <a href="#">Novell</a>         | <a href="#">Suse Studio Onsite</a> | 1.1     | All    | All     | All      |
| Application | <a href="#">Novell</a>         | <a href="#">Suse Studio Onsite</a> | 1.1     | All    | All     | All      |
