

# CVE-2011-5202

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                         |
|------------------------|-------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2011-5202                                                                                                           |
| <b>State</b>           | PUBLIC                                                                                                                  |
| <b>Assigner</b>        | cve@mitre.org                                                                                                           |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                            |
| <b>Published</b>       | 2012-10-01 20:55:00 UTC                                                                                                 |
| <b>Updated</b>         | 2017-08-29 01:30:00 UTC                                                                                                 |
| <b>Description</b>     | BasisVirtualCDBus.sys in WinCDEmu 3.6 allows local users to cause a denial of service (system crash) via the unmount cc |

## Risk And Classification

### Problem Types: CWE-119

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                   | Product                  | Version | Update | Edition | Language |
|-------------|--------------------------|--------------------------|---------|--------|---------|----------|
| Application | <a href="#">Sysprogs</a> | <a href="#">Wincdemu</a> | 3.6     | All    | All     | All      |
| Application | <a href="#">Sysprogs</a> | <a href="#">Wincdemu</a> | 3.6     | All    | All     | All      |
