

# CVE-2012-0102

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                        |
|------------------------|------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2012-0102                                                                                                          |
| <b>State</b>           | PUBLIC                                                                                                                 |
| <b>Assigner</b>        | secalert_us@oracle.com                                                                                                 |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                           |
| <b>Published</b>       | 2012-01-18 22:55:00 UTC                                                                                                |
| <b>Updated</b>         | 2019-12-17 20:26:00 UTC                                                                                                |
| <b>Description</b>     | Unspecified vulnerability in the MySQL Server component in Oracle MySQL 5.0.x and 5.1.x allows remote authenticated us |

## Risk And Classification

**Problem Types:** NVD-CWE-noinfo

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                | Product               | Version      | Update | Edition | Language |
|-------------|-----------------------|-----------------------|--------------|--------|---------|----------|
| Application | <a href="#">Mysql</a> | <a href="#">Mysql</a> | 5.0.0        | All    | All     | All      |
