Summary

CVE	CVE-2012-0529
State	PUBLISHED
Assigner	oracle
Source Priority	CVE Program / NVD first with legacy fallback
Published	2012-05-03 17:55:02 UTC
Updated	2026-04-29 01:13:23 UTC
Description	Unspecified vulnerability in the PeopleSoft Enterprise PeopleTools component in Oracle PeopleSoft Products 8.51 allows remote attackers to execute arbitrary code or cause a denial of service (memory consumption) via a crafted SOAP request, as demonstrated by the 'getProductVersion' method. The vulnerability exists in the 'getProductVersion' method of the 'ProductVersionService' class. The method does not properly validate the 'productVersion' parameter, which can be used to trigger a denial of service or execute arbitrary code. The vulnerability is caused by a buffer overflow in the 'getProductVersion' method. The vulnerability is caused by a buffer overflow in the 'getProductVersion' method. The vulnerability is caused by a buffer overflow in the 'getProductVersion' method.
