

# CVE-2012-0748

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                             |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2012-0748                                                                                                               |
| <b>State</b>           | PUBLIC                                                                                                                      |
| <b>Assigner</b>        | psirt@us.ibm.com                                                                                                            |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                |
| <b>Published</b>       | 2012-10-01 18:55:00 UTC                                                                                                     |
| <b>Updated</b>         | 2017-08-29 01:31:00 UTC                                                                                                     |
| <b>Description</b>     | Multiple cross-site request forgery (CSRF) vulnerabilities in unspecified services in IBM Rational Team Concert (RTC) 4.x b |

## Risk And Classification

**Problem Types:** CWE-352

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor              | Product                               | Version | Update | Edition | Language |
|-------------|---------------------|---------------------------------------|---------|--------|---------|----------|
| Application | <a href="#">ibm</a> | <a href="#">Rational Team Concert</a> | 4.0     | All    | All     | All      |
| Application | <a href="#">ibm</a> | <a href="#">Rational Team Concert</a> | 4.0     | All    | All     | All      |
