

# CVE-2012-2208

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                                              |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2012-2208                                                                                                                                                |
| <b>State</b>           | PUBLIC                                                                                                                                                       |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                                                |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                                                 |
| <b>Published</b>       | 2012-08-14 22:55:00 UTC                                                                                                                                      |
| <b>Updated</b>         | 2017-08-29 01:31:00 UTC                                                                                                                                      |
| <b>Description</b>     | Directory traversal vulnerability in upgrade.php in Piwigo before 2.3.4 allows remote attackers to include and execute arbitrary code via a crafted request. |

## Risk And Classification

### Problem Types: CWE-22

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor | Product | Version | Update | Edition | Language |
|-------------|--------|---------|---------|--------|---------|----------|
| Application | Piwigo | Piwigo  | All     | All    | All     | All      |
