CVE-2012-3484

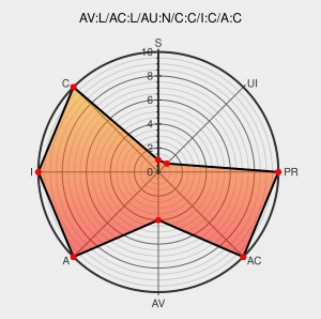
Source: Mitre | Source: NIST | CVE.ORG | Print: PDF



Certain versions of Tunnelblick from Google contain the following vulnerability:

Tunnelblick 3.3beta20 and earlier relies on a test for specific ownership and permissions to determine whether a program can be safely executed, which allows local users to bypass intended access restrictions and gain privileges via a (1) user-mountable image or (2) network share.

CVE-2012-3484 has been assigned by secalert@redhat.com to track the vulnerability

CVSS2 Score: 7.2 - HIGH
