

# CVE-2012-3809

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                             |
|------------------------|-----------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2012-3809                                                               |
| <b>State</b>           | PUBLIC                                                                      |
| <b>Assigner</b>        | cve@mitre.org                                                               |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                |
| <b>Published</b>       | 2020-01-09 22:15:00 UTC                                                     |
| <b>Updated</b>         | 2020-01-11 00:51:00 UTC                                                     |
| <b>Description</b>     | Samsung Kies before 2.5.0.12094_27_11 has arbitrary directory modification. |

## Risk And Classification

**Problem Types:** NVD-CWE-noinfo

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                  | Product              | Version | Update | Edition | Language |
|-------------|-------------------------|----------------------|---------|--------|---------|----------|
| Application | <a href="#">Samsung</a> | <a href="#">Kies</a> | All     | All    | All     | All      |
| Application | <a href="#">Samsung</a> | <a href="#">Kies</a> | All     | All    | All     | All      |
