

# CVE-2012-5007

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                               |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2012-5007                                                                                                                 |
| <b>State</b>           | PUBLIC                                                                                                                        |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                 |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                  |
| <b>Published</b>       | 2012-09-20 03:46:00 UTC                                                                                                       |
| <b>Updated</b>         | 2012-09-20 18:47:00 UTC                                                                                                       |
| <b>Description</b>     | The Fill PDF module 7.x-1.x before 7.x-1.2 for Drupal allows remote attackers to write to arbitrary PDF files via unspecified |

## Risk And Classification

### Problem Types: CWE-264

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                          | Product                 | Version | Update | Edition | Language |
|-------------|---------------------------------|-------------------------|---------|--------|---------|----------|
| Application | <a href="#">Drupal</a>          | <a href="#">Drupal</a>  | -       | All    | All     | All      |
| Application | <a href="#">Drupal</a>          | <a href="#">Drupal</a>  | -       | All    | All     | All      |
