

# CVE-2012-6560

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                        |
|------------------------|------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2012-6560                                                                                                          |
| <b>State</b>           | PUBLIC                                                                                                                 |
| <b>Assigner</b>        | cve@mitre.org                                                                                                          |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                           |
| <b>Published</b>       | 2013-05-23 15:55:00 UTC                                                                                                |
| <b>Updated</b>         | 2017-08-29 01:32:00 UTC                                                                                                |
| <b>Description</b>     | SQL injection vulnerability in deviceadd.php in FreeNAC 3.02 allows remote attackers to execute arbitrary SQL commands |

## Risk And Classification

### Problem Types: CWE-20

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                  | Product                 | Version | Update | Edition | Language |
|-------------|-------------------------|-------------------------|---------|--------|---------|----------|
| Application | <a href="#">Freenac</a> | <a href="#">Freenac</a> | 3.0.2   | All    | All     | All      |
| Application | <a href="#">Freenac</a> | <a href="#">Freenac</a> | 3.0.2   | All    | All     | All      |
