

# CVE-2013-3936

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                           |
|------------------------|---------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2013-3936                                                                                                             |
| <b>State</b>           | PUBLIC                                                                                                                    |
| <b>Assigner</b>        | PSIRT-CNA@flexerasoftware.com                                                                                             |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                              |
| <b>Published</b>       | 2020-01-02 15:15:00 UTC                                                                                                   |
| <b>Updated</b>         | 2020-01-08 14:55:00 UTC                                                                                                   |
| <b>Description</b>     | Multiple cross-site scripting (XSS) vulnerabilities in Opsview before 4.4.1 and Opsview Core before 20130522 allow remote |

## Risk And Classification

### Problem Types: CWE-79

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                  | Product                      | Version | Update | Edition | Language |
|-------------|-------------------------|------------------------------|---------|--------|---------|----------|
| Application | <a href="#">Opsview</a> | <a href="#">Opsview</a>      | All     | All    | All     | All      |
| Application | <a href="#">Opsview</a> | <a href="#">Opsview</a>      | All     | All    | All     | All      |
| Application | <a href="#">Opsview</a> | <a href="#">Opsview Core</a> | All     | All    | All     | All      |
| Application | <a href="#">Opsview</a> | <a href="#">Opsview Core</a> | All     | All    | All     | All      |
