

# CVE-2013-4036

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                 |                                                                                                                         |
|-----------------|-------------------------------------------------------------------------------------------------------------------------|
| CVE             | CVE-2013-4036                                                                                                           |
| State           | PUBLISHED                                                                                                               |
| Assigner        | ibm                                                                                                                     |
| Source Priority | CVE Program / NVD first with legacy fallback                                                                            |
| Published       | 2013-11-27 04:43:33 UTC                                                                                                 |
| Updated         | 2026-04-29 01:13:23 UTC                                                                                                 |
| Description     | Cross-site scripting (XSS) vulnerability in IBM InfoSphere Master Data Management Server for Product Information Manage |

## Risk And Classification

**Primary CVSS:** v2.0 3.5 from nvd@nist.gov

AV:N/AC:M/Au:S/C:N/I:P/A:N

**EPSS:** 0.001660000 probability, percentile 0.373430000 (date 2026-04-29)

**Problem Types:** CWE-79 | n/a
