

# CVE-2013-4168

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                               |
|------------------------|-----------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2013-4168                                                                                 |
| <b>State</b>           | PUBLIC                                                                                        |
| <b>Assigner</b>        | secalert@redhat.com                                                                           |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                  |
| <b>Published</b>       | 2019-11-01 20:15:00 UTC                                                                       |
| <b>Updated</b>         | 2020-08-18 15:05:00 UTC                                                                       |
| <b>Description</b>     | Cross-site scripting (XSS) vulnerability in SmokePing 2.6.9 in the start and end time fields. |

## Risk And Classification

### Problem Types: CWE-79

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor                        | Product                      | Version | Update | Edition | Language |
