CVE-2013-4471

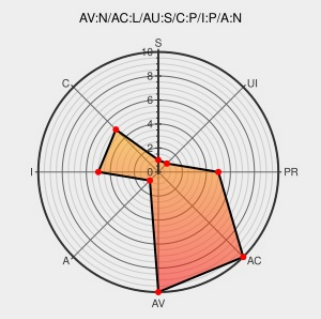
Source: Mitre | Source: NIST | CVE.ORG | Print: PDF



Certain versions of Horizon from Openstack contain the following vulnerability:

The Identity v3 API in OpenStack Dashboard (Horizon) before 2013.2 does not require the current password when changing passwords for user accounts, which makes it easier for remote attackers to change a user password by leveraging the authentication token for that user.

CVE-2013-4471 has been assigned by secalert@redhat.com to track the vulnerability

CVSS2 Score: 5.5 - MEDIUM

Access Vector	Access Complexity	Authentication
