

# CVE-2013-4848

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                       |
|------------------------|-----------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2013-4848                                                         |
| <b>State</b>           | PUBLIC                                                                |
| <b>Assigner</b>        | cve@mitre.org                                                         |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                          |
| <b>Published</b>       | 2019-10-25 17:15:00 UTC                                               |
| <b>Updated</b>         | 2019-10-28 18:58:00 UTC                                               |
| <b>Description</b>     | TP-Link TL-WDR4300 version 3.13.31 has multiple CSRF vulnerabilities. |

## Risk And Classification

**Problem Types:** CWE-352

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor                  | Product                             | Version | Update | Edition | Language |
|------------------|-------------------------|-------------------------------------|---------|--------|---------|----------|
| Hardware         | <a href="#">Tp-link</a> | <a href="#">TI-wdr4300</a>          | -       | All    | All     | All      |
