

# CVE-2013-5113

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                             |
|------------------------|-------------------------------------------------------------|
| <b>CVE</b>             | CVE-2013-5113                                               |
| <b>State</b>           | PUBLIC                                                      |
| <b>Assigner</b>        | cve@mitre.org                                               |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                |
| <b>Published</b>       | 2020-01-31 15:15:00 UTC                                     |
| <b>Updated</b>         | 2020-02-11 19:30:00 UTC                                     |
| <b>Description</b>     | LastPass prior to 2.5.1 has an insecure PIN implementation. |

## Risk And Classification

**Problem Types:** CWE-522

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                  | Product                  | Version | Update | Edition | Language |
|-------------|-------------------------|--------------------------|---------|--------|---------|----------|
| Application | <a href="#">Logmein</a> | <a href="#">Lastpass</a> | All     | All    | All     | All      |
| Application | <a href="#">Logmein</a> | <a href="#">Lastpass</a> | All     | All    | All     | All      |
