

# CVE-2013-6706

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                         |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2013-6706                                                                                                                           |
| <b>State</b>           | PUBLIC                                                                                                                                  |
| <b>Assigner</b>        | psirt@cisco.com                                                                                                                         |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                            |
| <b>Published</b>       | 2013-11-29 04:33:00 UTC                                                                                                                 |
| <b>Updated</b>         | 2016-11-02 17:42:00 UTC                                                                                                                 |
| <b>Description</b>     | The Cisco Express Forwarding processing module in Cisco IOS XE allows remote attackers to cause a denial of service (denial of service) |

## Risk And Classification

### Problem Types: CWE-20

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor | Product | Version | Update | Edition | Language |
|------------------|--------|---------|---------|--------|---------|----------|
| Operating System | Cisco  | Ios Xe  | -       | All    | All     | All      |
| Operating System | Cisco  | Ios Xe  | -       | All    | All     | All      |
