## Summary

|                 |                                                                                                                      |
|-----------------|----------------------------------------------------------------------------------------------------------------------|
| CVE             | CVE-2014-0045                                                                                                        |
| State           | PUBLISHED                                                                                                            |
| Assigner        | redhat                                                                                                               |
| Source Priority | CVE Program / NVD first with legacy fallback                                                                         |
| Published       | 2014-02-08 00:55:06 UTC                                                                                              |
| Updated         | 2026-04-29 01:13:23 UTC                                                                                              |
| Description     | The needSamples method in AudioOutputSpeech.cpp in the client in Mumble 1.2.4 and the 1.2.3 pre-release snapshots, M |

## Risk And Classification

**Primary CVSS:** v2.0 7.5 from nvd@nist.gov

AV:N/AC:L/Au:N/C:P/I:P/A:P

**EPSS:** 0.026550000 probability, percentile 0.858380000 (date 2026-05-04)

**Problem Types:** CWE-189 | n/a
