

# CVE-2014-6130

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                          |
|------------------------|--------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2014-6130                                                                                                            |
| <b>State</b>           | PUBLIC                                                                                                                   |
| <b>Assigner</b>        | psirt@us.ibm.com                                                                                                         |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                             |
| <b>Published</b>       | 2014-11-04 18:55:00 UTC                                                                                                  |
| <b>Updated</b>         | 2017-09-08 01:29:00 UTC                                                                                                  |
| <b>Description</b>     | The IBM Notes Traveler application before 9.0.1.3 for Android lacks a warning message during selection of an HTTP sessio |

## Risk And Classification

**Problem Types:** CWE-200

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor | Product        | Version | Update | Edition | Language |
|-------------|--------|----------------|---------|--------|---------|----------|
| Application | ibm    | Notes Traveler | All     | All    | All     | All      |

## References
