

# CVE-2014-7877

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                             |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2014-7877                                                                                                               |
| <b>State</b>           | PUBLIC                                                                                                                      |
| <b>Assigner</b>        | hp-security-alert@hp.com                                                                                                    |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                |
| <b>Published</b>       | 2014-10-30 10:55:00 UTC                                                                                                     |
| <b>Updated</b>         | 2017-09-08 01:29:00 UTC                                                                                                     |
| <b>Description</b>     | Unspecified vulnerability in the kernel in HP HP-UX B.11.31 allows local users to cause a denial of service via unknown vec |

## Risk And Classification

**Problem Types:** NVD-CWE-noinfo

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor             | Product               | Version | Update | Edition | Language |
|------------------|--------------------|-----------------------|---------|--------|---------|----------|
| Operating System | <a href="#">Hp</a> | <a href="#">Hp-ux</a> | b.11.31 | All    | All     | All      |
| Operating System | <a href="#">Hp</a> | <a href="#">Hp-ux</a> | b.11.31 | All    | All     | All      |
