

# CVE-2014-9593

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                             |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2014-9593                                                                                                               |
| <b>State</b>           | PUBLIC                                                                                                                      |
| <b>Assigner</b>        | cve@mitre.org                                                                                                               |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                |
| <b>Published</b>       | 2015-01-15 15:59:00 UTC                                                                                                     |
| <b>Updated</b>         | 2015-01-16 18:34:00 UTC                                                                                                     |
| <b>Description</b>     | Apache CloudStack before 4.3.2 and 4.4.x before 4.4.2 allows remote attackers to obtain private keys via a listSslCerts API |

## Risk And Classification

**Problem Types:** CWE-200

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                 | Product                    | Version | Update | Edition | Language |
|-------------|------------------------|----------------------------|---------|--------|---------|----------|
| Application | <a href="#">Apache</a> | <a href="#">Cloudstack</a> | 4.4.0   | All    | All     | All      |
| Application | <a href="#">Apache</a> | <a href="#">Cloudstack</a> | 4.4.1   | All    | All     | All      |
| Application | <a href="#">Apache</a> | <a href="#">Cloudstack</a> | 4.4.0   | All    | All     | All      |
| Application | <a href="#">Apache</a> | <a href="#">Cloudstack</a> | 4.4.1   | All    | All     | All      |
| Application | <a href="#">Apache</a> | <a href="#">Cloudstack</a> | All     | All    | All     | All      |
