

# CVE-2015-1458

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                   |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2015-1458                                                                                                                     |
| <b>State</b>           | PUBLIC                                                                                                                            |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                     |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                      |
| <b>Published</b>       | 2015-02-03 16:59:00 UTC                                                                                                           |
| <b>Updated</b>         | 2017-09-08 01:29:00 UTC                                                                                                           |
| <b>Description</b>     | Fortinet FortiAuthenticator 3.0.0 allows local users to bypass intended restrictions and gain privileges by creating /tmp/private |

## Risk And Classification

### Problem Types: CWE-264

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                   | Product                            | Version | Update | Edition | Language |
|-------------|--------------------------|------------------------------------|---------|--------|---------|----------|
| Application | <a href="#">Fortinet</a> | <a href="#">Fortiauthenticator</a> | 3.0.0   | All    | All     | All      |
| Application | <a href="#">Fortinet</a> | <a href="#">Fortiauthenticator</a> | 3.0.0   | All    | All     | All      |
