

# CVE-2015-2944

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                               |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2015-2944                                                                                                                 |
| <b>State</b>           | PUBLIC                                                                                                                        |
| <b>Assigner</b>        | vultures@jpcert.or.jp                                                                                                         |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                  |
| <b>Published</b>       | 2015-06-02 14:59:00 UTC                                                                                                       |
| <b>Updated</b>         | 2023-11-07 02:25:00 UTC                                                                                                       |
| <b>Description</b>     | Multiple cross-site scripting (XSS) vulnerabilities in Apache Sling API before 2.2.2 and Apache Sling Servlets Post before 2. |

## Risk And Classification

### Problem Types: CWE-79

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                 | Product                             | Version | Update | Edition | Language |
|-------------|------------------------|-------------------------------------|---------|--------|---------|----------|
| Application | <a href="#">Apache</a> | <a href="#">Sling Api</a>           | All     | All    | All     | All      |
| Application | <a href="#">Apache</a> | <a href="#">Sling Servlets Post</a> | All     | All    | All     | All      |
