

# CVE-2015-4085

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                           |
|------------------------|-----------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2015-4085                                                                                             |
| <b>State</b>           | PUBLIC                                                                                                    |
| <b>Assigner</b>        | cve@mitre.org                                                                                             |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                              |
| <b>Published</b>       | 2017-09-07 20:29:00 UTC                                                                                   |
| <b>Updated</b>         | 2017-09-18 16:54:00 UTC                                                                                   |
| <b>Description</b>     | Directory traversal vulnerability in node/hooks/express/tests.js in Etherpad frontend tests before 1.6.1. |

## Risk And Classification

**Problem Types:** CWE-22

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                   | Product                  | Version | Update | Edition | Language |
|-------------|--------------------------|--------------------------|---------|--------|---------|----------|
| Application | <a href="#">Etherpad</a> | <a href="#">Etherpad</a> | All     | All    | All     | All      |
