

# CVE-2015-5420

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2015-5420                                                                                                                  |
| <b>State</b>           | PUBLIC                                                                                                                         |
| <b>Assigner</b>        | hp-security-alert@hp.com                                                                                                       |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                   |
| <b>Published</b>       | 2015-08-24 22:59:00 UTC                                                                                                        |
| <b>Updated</b>         | 2019-02-12 18:25:00 UTC                                                                                                        |
| <b>Description</b>     | Unspecified vulnerability in HP KeyView before 10.23.0.1 and 10.24.x before 10.24.0.1 allows remote attackers to execute :<br> |

## Risk And Classification

**Problem Types:** NVD-CWE-noinfo

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor             | Product                 | Version | Update | Edition | Language |
|-------------|--------------------|-------------------------|---------|--------|---------|----------|
| Application | <a href="#">Hp</a> | <a href="#">Keyview</a> | All     | All    | All     | All      |
| Application | <a href="#">Hp</a> | <a href="#">Keyview</a> | All     | All    | All     | All      |
