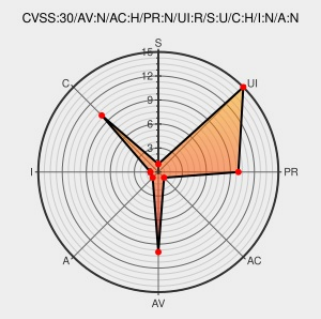
Last Modified on: 03/23/2021 11:26:21 PM UTC

CVE-2015-9232

Source: Mitre | Source: NIST | CVE.ORG | Print: PDF



Certain versions of Good For Enterprise from Good contain the following vulnerability:

The Good for Enterprise application 3.0.0.415 for Android does not use signature protection for its Authentication Delegation API intent. Also, the Good Dynamic application activation process does not attempt to detect malicious activation attempts involving modified names beginning with a com.good.gdgma substring. Consequently, an attacker could obtain access to intranet data. This issue is only relevant in cases where the user has already downloaded a malicious Android application.

CVE-2015-9232 has been assigned by cve@mitre.org to track the vulnerability - currently rated as MEDIUM severity.

CVSS3 Score: 5.3 - MEDIUM

Attack Vector	Attack Complexity	Privileges Required	User Interaction
NETWORK	HIGH	NONE	REQUIRED
Scope	**Confidentiality Impact**	**Integrity Impact**	**Availability Impact**
UNCHANGED	HIGH	NONE	NONE

CVSS2 Score: 2.6 - LOW

Access Vector	Access Complexity	Authentication
NETWORK	HIGH	NONE
Confidentiality Impact	**Integrity Impact**	**Availability Impact**
PARTIAL	NONE	NONE
