Summary

CVE	CVE-2016-0467
State	PUBLISHED
Assigner	oracle
Source Priority	CVE Program / NVD first with legacy fallback
Published	2016-01-21 03:00:17 UTC
Updated	2026-05-06 22:30:45 UTC
Description	Unspecified vulnerability in the Security component in Oracle Database Server 11.2.0.4, 12.1.0.1, and 12.1.0.2 allows remote attackers to execute arbitrary code or cause a denial of service (DoS) via a crafted SQL statement. The vulnerability is due to the Security component not properly validating the SQL statement. The attacker can cause a denial of service (DoS) or execute arbitrary code. The vulnerability is due to the Security component not properly validating the SQL statement. The attacker can cause a denial of service (DoS) or execute arbitrary code. The vulnerability is due to the Security component not properly validating the SQL statement. The attacker can cause a denial of service (DoS) or execute arbitrary code.

Risk And Classification
