

# CVE-2016-10236

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                            |
|------------------------|----------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2016-10236                                                                                                             |
| <b>State</b>           | PUBLIC                                                                                                                     |
| <b>Assigner</b>        | security@android.com                                                                                                       |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                               |
| <b>Published</b>       | 2018-04-04 18:29:00 UTC                                                                                                    |
| <b>Updated</b>         | 2018-05-04 19:11:00 UTC                                                                                                    |
| <b>Description</b>     | An information disclosure vulnerability in the Qualcomm USB driver. Product: Android. Versions: Android kernel. Android ID |

## Risk And Classification

**Problem Types:** CWE-200

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor                 | Product                 | Version | Update | Edition | Language |
|------------------|------------------------|-------------------------|---------|--------|---------|----------|
| Operating System | <a href="#">Google</a> | <a href="#">Android</a> | -       | All    | All     | All      |
| Operating System | <a href="#">Google</a> | <a href="#">Android</a> | -       | All    | All     | All      |
