

# CVE-2016-5098

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2016-5098                                                                                                                  |
| <b>State</b>           | PUBLIC                                                                                                                         |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                  |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                   |
| <b>Published</b>       | 2016-07-05 01:59:00 UTC                                                                                                        |
| <b>Updated</b>         | 2018-10-30 16:27:00 UTC                                                                                                        |
| <b>Description</b>     | Directory traversal vulnerability in libraries/error_report.lib.php in phpMyAdmin before 4.6.2-prerelease allows remote attack |

## Risk And Classification

### Problem Types: CWE-22

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor                     | Product                    | Version | Update | Edition | Language |
|------------------|----------------------------|----------------------------|---------|--------|---------|----------|
| Operating System | <a href="#">Opensuse</a>   | <a href="#">Opensuse</a>   | 13.1    | All    | All     | All      |
| Operating System | <a href="#">Opensuse</a>   | <a href="#">Opensuse</a>   | 13.1    | All    | All     | All      |
| Application      | <a href="#">Phpmyadmin</a> | <a href="#">Phpmyadmin</a> | 4.6.2   | All    | All     | All      |
| Application      | <a href="#">Phpmyadmin</a> | <a href="#">Phpmyadmin</a> | 4.6.2   | All    | All     | All      |
