## Summary

|                 |                                                                                                                       |
|-----------------|-----------------------------------------------------------------------------------------------------------------------|
| CVE             | CVE-2016-7109                                                                                                         |
| State           | PUBLISHED                                                                                                             |
| Assigner        | mitre                                                                                                                 |
| Source Priority | CVE Program / NVD first with legacy fallback                                                                          |
| Published       | 2016-09-07 19:28:24 UTC                                                                                               |
| Updated         | 2026-05-06 22:30:45 UTC                                                                                               |
| Description     | Huawei Unified Maintenance Audit (UMA) before V200R001C00SPC200 allows remote attackers to execute arbitrary commands |

## Risk And Classification

**Primary CVSS:** v3.0 9.8 CRITICAL from nvd@nist.gov

CVSS:3.0/AV:N/AC:L/PR:N/UI:N/S:U/C:H/I:H/A:H

**EPSS:** 0.017490000 probability, percentile 0.826510000 (date 2026-05-06)

**Problem Types:** CWE-94 | n/a

| Version | Source       | Type    | Score | Severity | Vector                                       |
|---------|--------------|---------|-------|----------|----------------------------------------------|
| 3.0     | nvd@nist.gov | Primary | 9.8   | CRITICAL | CVSS:3.0/AV:N/AC:L/PR:N/UI:N/S:U/C:H/I:H/A:H |
| 2.0     | nvd@nist.gov | Primary | 10    |          | AV:N/AC:L/Au:N/C:C/I:C/A:C                   |
