

# CVE-2016-8383

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                          |
|------------------------|--------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2016-8383                                                                                                            |
| <b>State</b>           | PUBLIC                                                                                                                   |
| <b>Assigner</b>        | talos-cna@cisco.com                                                                                                      |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                             |
| <b>Published</b>       | 2018-04-24 19:29:00 UTC                                                                                                  |
| <b>Updated</b>         | 2022-12-13 21:14:00 UTC                                                                                                  |
| <b>Description</b>     | An exploitable heap corruption vulnerability exists in the Doc_GetFontTable functionality of AntennaHouse DMC HTMLFilter |

## Risk And Classification

### Problem Types: CWE-119

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                    | Product                   | Version | Update | Edition | Language |
|-------------|---------------------------|---------------------------|---------|--------|---------|----------|
| Application | <a href="#">Marklogic</a> | <a href="#">Marklogic</a> | 8.0-5.5 | All    | All     | All      |
| Application | <a href="#">Marklogic</a> | <a href="#">Marklogic</a> | 8.0-5.5 | All    | All     | All      |
