CVE-2017-1000400

[Source: Mitre](#)[Source: NIST](#)[CVE.ORG](#)[Print: PDF](#) 

Certain versions of [Jenkins](#) from [Jenkins](#) contain the following vulnerability:

The Jenkins 2.73.1 and earlier, 2.83 and earlier remote API at `/job/(job-name)/api` contained information about upstream and downstream projects. This included information about tasks that the current user otherwise has no access to, e.g. due to lack of Item/Read permission.

This has been fixed, and the API now only lists upstream and downstream projects that the current user has access to.

CVE-2017-1000400 has been assigned by [M](#) [cve@mitre.org](#) to track the vulnerability - currently rated as **MEDIUM** severity.
