

# CVE-2017-11011

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                 |
|------------------------|-----------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2017-11011                                                                                                  |
| <b>State</b>           | PUBLIC                                                                                                          |
| <b>Assigner</b>        | product-security@qualcomm.com                                                                                   |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                    |
| <b>Published</b>       | 2018-04-11 15:29:00 UTC                                                                                         |
| <b>Updated</b>         | 2018-05-16 18:04:00 UTC                                                                                         |
| <b>Description</b>     | In Android before security patch level 2018-04-05 on Qualcomm Snapdragon Mobile and Snapdragon Wear MDM9206, MD |

## Risk And Classification

### Problem Types: CWE-416

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor                   | Product                          | Version | Update | Edition | Language |
