## Summary

|                 |                                                                                                                              |
|-----------------|------------------------------------------------------------------------------------------------------------------------------|
| CVE             | CVE-2017-13175                                                                                                               |
| State           | PUBLISHED                                                                                                                    |
| Assigner        | google_android                                                                                                               |
| Source Priority | CVE Program / NVD first with legacy fallback                                                                                 |
| Published       | 2017-12-06 14:29:01 UTC                                                                                                      |
| Updated         | 2025-04-20 01:37:25 UTC                                                                                                      |
| Description     | An information disclosure vulnerability in the NVIDIA libwilhelm. Product: Android. Versions: Android kernel. Android ID A-6 |

## Risk And Classification

**Primary CVSS:** v3.0 7.5 HIGH from nvd@nist.gov

CVSS:3.0/AV:N/AC:L/PR:N/UI:N/S:U/C:H/I:N/A:N

**EPSS:** 0.001170000 probability, percentile 0.300590000 (date 2026-05-15)

**Problem Types:** CWE-200 | Information disclosure

| Version | Source       | Type    | Score | Severity | Vector                                       |
