

# CVE-2017-15094

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                      |
|------------------------|----------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2017-15094                                                                                                       |
| <b>State</b>           | PUBLIC                                                                                                               |
| <b>Assigner</b>        | secalert@redhat.com                                                                                                  |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                         |
| <b>Published</b>       | 2018-01-23 15:29:00 UTC                                                                                              |
| <b>Updated</b>         | 2019-10-09 23:24:00 UTC                                                                                              |
| <b>Description</b>     | An issue has been found in the DNSSEC parsing code of PowerDNS Recursor from 4.0.0 up to and including 4.0.6 leading |

## Risk And Classification

**Problem Types:** CWE-772

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor   | Product  | Version | Update | Edition | Language |
|-------------|----------|----------|---------|--------|---------|----------|
| Application | Powerdns | Recursor | All     | All    | All     | All      |
