

# CVE-2017-2648

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                               |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2017-2648                                                                                                                 |
| <b>State</b>           | PUBLIC                                                                                                                        |
| <b>Assigner</b>        | secalert@redhat.com                                                                                                           |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                  |
| <b>Published</b>       | 2018-07-27 20:29:00 UTC                                                                                                       |
| <b>Updated</b>         | 2019-10-09 23:27:00 UTC                                                                                                       |
| <b>Description</b>     | It was found that jenkins-ssh-slaves-plugin before version 1.15 did not perform host key verification, thereby enabling Man-i |

## Risk And Classification

### Problem Types: CWE-295

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                  | Product                    | Version | Update | Edition | Language |
|-------------|-------------------------|----------------------------|---------|--------|---------|----------|
| Application | <a href="#">Jenkins</a> | <a href="#">Ssh Slaves</a> | All     | All    | All     | All      |
| Application | <a href="#">Jenkins</a> | <a href="#">Ssh Slaves</a> | All     | All    | All     | All      |
