

# CVE-2017-5869

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                                                                              |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2017-5869                                                                                                                                                                                |
| <b>State</b>           | PUBLIC                                                                                                                                                                                       |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                                                                                |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                                                                                 |
| <b>Published</b>       | 2017-03-24 14:59:00 UTC                                                                                                                                                                      |
| <b>Updated</b>         | 2017-08-16 01:29:00 UTC                                                                                                                                                                      |
| <b>Description</b>     | Directory traversal vulnerability in the file import feature in Nuxeo Platform 6.0, 7.1, 7.2, and 7.3 allows remote authenticated users to read arbitrary files via the file import feature. |

## Risk And Classification

### Problem Types: CWE-22

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                | Product               | Version | Update | Edition | Language |
|-------------|-----------------------|-----------------------|---------|--------|---------|----------|
| Application | <a href="#">Nuxeo</a> | <a href="#">Nuxeo</a> | 6.0     | All    | All     | All      |
| Application | <a href="#">Nuxeo</a> | <a href="#">Nuxeo</a> | 7.1     | All    | All     | All      |
| Application | <a href="#">Nuxeo</a> | <a href="#">Nuxeo</a> | 7.2     | All    | All     | All      |
| Application | <a href="#">Nuxeo</a> | <a href="#">Nuxeo</a> | 7.3     | All    | All     | All      |
| Application | <a href="#">Nuxeo</a> | <a href="#">Nuxeo</a> | 6.0     | All    | All     | All      |
| Application | <a href="#">Nuxeo</a> | <a href="#">Nuxeo</a> | 7.1     | All    | All     | All      |
| Application | <a href="#">Nuxeo</a> | <a href="#">Nuxeo</a> | 7.2     | All    | All     | All      |
| Application | <a href="#">Nuxeo</a> | <a href="#">Nuxeo</a> | 7.3     | All    | All     | All      |
