Certain versions of [X-pack](#) from [Elastic](#) contain the following vulnerability:

An error was found in the X-Pack Security TLS trust manager for versions 5.0.0 to 5.5.1. If reloading the trust material fails the trust manager will be replaced with an instance that trusts all certificates. This could allow any node using any certificate to join a cluster. The proper behavior in this instance is for the TLS trust manager to deny all certificates.

CVE-2017-8445 has been assigned by security@elastic.co to track the vulnerability - currently rated as **MEDIUM** severity.
