

# CVE-2017-9205

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                         |
|------------------------|-------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2017-9205                                                                                                           |
| <b>State</b>           | PUBLIC                                                                                                                  |
| <b>Assigner</b>        | cve@mitre.org                                                                                                           |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                            |
| <b>Published</b>       | 2017-05-23 04:29:00 UTC                                                                                                 |
| <b>Updated</b>         | 2019-09-16 14:33:00 UTC                                                                                                 |
| <b>Description</b>     | The iw_get_ui16be function in imagew-util.c:422:24 in libimageworsener.a in ImageWorsener 1.3.1 allows remote attackers |

## Risk And Classification

### Problem Types: CWE-125

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                      | Product                       | Version | Update | Edition | Language |
|-------------|-----------------------------|-------------------------------|---------|--------|---------|----------|
| Application | <a href="#">Entropymine</a> | <a href="#">Imageworsener</a> | 1.3.1   | All    | All     | All      |
| Application | <a href="#">Entropymine</a> | <a href="#">Imageworsener</a> | 1.3.1   | All    | All     | All      |
