

# CVE-2019-10280

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                               |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2019-10280                                                                                                                |
| <b>State</b>           | PUBLIC                                                                                                                        |
| <b>Assigner</b>        | jenkinsci-cert@googlegroups.com                                                                                               |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                  |
| <b>Published</b>       | 2019-04-04 16:29:00 UTC                                                                                                       |
| <b>Updated</b>         | 2023-10-25 18:16:00 UTC                                                                                                       |
| <b>Description</b>     | Jenkins Assembla Auth Plugin stores credentials unencrypted in the global config.xml configuration file on the Jenkins master |

## Risk And Classification

**Problem Types:** CWE-522

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                  | Product                       | Version | Update | Edition | Language |
|-------------|-------------------------|-------------------------------|---------|--------|---------|----------|
| Application | <a href="#">Jenkins</a> | <a href="#">Assembla Auth</a> | All     | All    | All     | All      |
| Application | <a href="#">Jenkins</a> | <a href="#">Assembla Auth</a> | All     | All    | All     | All      |
