CVSS:30/AV:N/AC:L/PR:N/UI:R/S:U/C:H/I:N/A:N

Certain versions of [Password Manager](#) from [Uniqkey](#) contain the following vulnerability:

An issue was discovered in Uniqkey Password Manager 1.14. When entering new credentials to a site that isn't registered within this product, a pop-up window will appear asking the user if they want to save these new credentials. The code of the pop-up window can be read and, to some extent, manipulated by remote servers. This pop-up

window will stay on any page the user visits within the browser until a decision is made. A malicious web server can forcefully manipulate the pop-up and cause it not to appear, stopping users from securing their credentials. This vulnerability is related to id="uniqkey-password-popup" and password-popup/popup.html, but is a different vulnerability than CVE-2019-10676.

CVE-2019-10845 has been assigned by [M](#) cve@mitre.org to track the vulnerability - currently rated as **MEDIUM** severity.

CVSS3 Score: **6.5 - MEDIUM**

Attack Vector	Attack Complexity	Privileges Required	User Interaction
NETWORK	LOW	NONE	REQUIRED
Scope	Confidentiality Impact	Integrity Impact	Availability Impact
UNCHANGED	HIGH	NONE	NONE

CVSS2 Score: **4.3 - MEDIUM**

Access Vector	Access Complexity	Authentication
NETWORK	MEDIUM	NONE
Confidentiality Impact	Integrity Impact	Availability Impact
PARTIAL	NONE	NONE
