

# CVE-2019-11062

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                     |
|------------------------|---------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2019-11062                                                                                                      |
| <b>State</b>           | PUBLIC                                                                                                              |
| <b>Assigner</b>        | cve@cert.org.tw                                                                                                     |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                        |
| <b>Published</b>       | 2019-07-11 19:15:00 UTC                                                                                             |
| <b>Updated</b>         | 2023-03-01 16:33:00 UTC                                                                                             |
| <b>Description</b>     | The SUNNET WMPPro v5.0 and v5.1 for eLearning system has OS Command Injection via "/teach/course/doajaxfileupload.p |

## Risk And Classification

### Problem Types: CWE-78

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                  | Product               | Version | Update | Edition | Language |
|-------------|-------------------------|-----------------------|---------|--------|---------|----------|
| Application | <a href="#">Sun.net</a> | <a href="#">Wmpro</a> | 5.0     | All    | All     | All      |
| Application | <a href="#">Sun.net</a> | <a href="#">Wmpro</a> | 5.1     | All    | All     | All      |
| Application | <a href="#">Sun.net</a> | <a href="#">Wmpro</a> | 5.0     | All    | All     | All      |
| Application | <a href="#">Sun.net</a> | <a href="#">Wmpro</a> | 5.1     | All    | All     | All      |
