

# CVE-2019-11617

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                                                                                                 |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2019-11617                                                                                                                                                                                  |
| <b>State</b>           | PUBLIC                                                                                                                                                                                          |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                                                                                   |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                                                                                    |
| <b>Published</b>       | 2019-04-30 20:29:00 UTC                                                                                                                                                                         |
| <b>Updated</b>         | 2019-05-01 19:38:00 UTC                                                                                                                                                                         |
| <b>Description</b>     | doorGets 7.0 has a CSRF vulnerability in /doorgets/app/requests/user/configurationRequest.php. A remote attacker can exploit this vulnerability to change the configuration of the application. |

## Risk And Classification

**Problem Types:** CWE-352

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                   | Product                      | Version | Update | Edition | Language |
|-------------|--------------------------|------------------------------|---------|--------|---------|----------|
| Application | <a href="#">Doorgets</a> | <a href="#">Doorgets Cms</a> | 7.0     | All    | All     | All      |
| Application | <a href="#">Doorgets</a> | <a href="#">Doorgets Cms</a> | 7.0     | All    | All     | All      |
