

# CVE-2019-12453

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                          |
|------------------------|--------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2019-12453                                                                                                           |
| <b>State</b>           | PUBLIC                                                                                                                   |
| <b>Assigner</b>        | cve@mitre.org                                                                                                            |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                             |
| <b>Published</b>       | 2019-07-19 17:15:00 UTC                                                                                                  |
| <b>Updated</b>         | 2019-08-05 13:12:00 UTC                                                                                                  |
| <b>Description</b>     | In MicroStrategy Web before 10.1 patch 10, stored XSS is possible in the FLTB parameter due to missing input validation. |

## Risk And Classification

### Problem Types: CWE-79

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                        | Product                           | Version | Update | Edition | Language |
|-------------|-------------------------------|-----------------------------------|---------|--------|---------|----------|
| Application | <a href="#">Microstrategy</a> | <a href="#">Microstrategy Web</a> | All     | All    | All     | All      |
